

Identity Manager

The given tool to manage and delegate user information.

Overview

Many organizations are looking for ways to lower costs associated with service desk and streamline internal processes for creating, changing and deleting users or groups. This can be achieved by providing a tool that enables owners to manage their objects without contacting the service desk.

User friendly

The user friendly web interface, that can easily be customized, makes it easy for anyone to work with the product. Change look and feel to match your organization.

Features

With PhenixID Identity Manager (PIM), you can easily and effectively delegate administration of user accounts and other resources. PIM also supports self service, so users can change and update information about themselves. Download example roles to familiarize yourself with the product.

Reduce cost

Implementation of Identity Manager is uncomplicated and the need for training is minimal. The solution uses existing infrastructure, meaning no expensive additional costs.

Overview

PhenixID Identity Manager (PIM) allows you to delegate user management tasks to a service desk or to managers for example. This will reduce manually process and lower cost for your organization.

PIM also provides users with an easy to use self-service tool to manage information about themselves.

Integrates with existing infrastructure

Integrates easily with your infrastructure, e.g. Active Directory. No extra user store is added.

Web-based

Easy to use and access. Gives administrators and end-users a tool to change or view only what they are given permission to.

Look and feel

Customize the application with text and images and generate a look and feel like an application in your organization.

Customize to your organization's needs

Many times, an organization must adapt to an application because of its limitations. With PIM you can adapt the application to your organizations instead!

Examples of Identity Manager roles

- Self Service - User can login and view and edit information by themselves. E.g. add ICE, private mobile. ICE = incase of emergency
- Service Desk - Create, manage and delete user, group or other objects.
- Manager - A manager can search and manage its users, e.g. reset password, add mobile telephone, group membership
- Manage my distribution list - A user can manage group membership for its distribution lists for whom the user is owner
- Manage access to my SharePoint sites - A user can manage access to its SharePoint site or any resources protected by a group where the user is owner.
- Create your own roles - You can create your own roles quick and easy to map your needs.

Why PhenixID?

We are a Swedish company based in Stockholm. Our focus is to create applications that solves customer challenges while at the same time keep the cost at a low level.

All our products are built on open standards. All methods for delivering one-time passwords are included in the license.

Technical training is available at request. Third line support, with highly experienced technicians.
